About College

Consistently ranking as the best institute in the eastern part of India, MITS School of Biotechnology (MSB) is a self financing professional organisation that was founded in 2003. The faculty consists of having qualification of PhD, M.Tech as well as experience in both Academics and industrial research, so as the student graduates, who are equally impressive mostly working in leading industries of Biotechnology, Pharma and IT. MSB is considered to be most selective, accepting, growing and proven institute under Utkal University. The institute is located at the prime location of Infocity, Bhubaneswar. This prestigious institute includes popular programs of Biotechnology, Applied Micro Biology and Computer Science.

Courses Offered at MSB

BCA	- 3 Years
B.Sc Biotechnology	- 3 Years
M.Sc Biotechnology	- 2 Years
M.Sc App. Microbiology	- 2 Years

About Programme

A review paper, also known as a literature review, is a thorough, analytical examination of previously published literature. It also provides an overview of current research works on a particular topic in chronological order. The main objective of writing a review paper is to evaluate the existing data or results, which can be done through analysis, modeling, classification, comparison, and summary. Review papers can help to identify the research gaps, to explore potential areas in a particular field. It helps to come out with new conclusions from already published works.

Objective of the Programme

The objective of the seminar is to develop skill among the researchers and students regarding writing of Research and review articles. Further, we will discuss how the research/review articles could be published in national and international Journals. The main objective of writing a review paper is to evaluate the existing data or results, which can be done through analysis, modeling, classification, comparison, and summary.

PROGRAMME REPORT

03/08/2018

Programme Name	A One Day Seminar on "Art of Writing Review Articles and Research Thesis
Date of Activity:	02/08/2018
Resource Person:	Mrs. Sanghamitra Mohapatra CSIR Fellow, IMMT, Bhubaneswar Contact No: 9337030885 Email: <i>ssmohapatragmail.com</i>
Organised By:	MITS School of Biotechnology
Venue:	Dept. Biotechnology, MSB, Bhubaneswar

Objective of the programme

There is consistent demand on academicians to produce good quality research papers. This demand is institutionalized in the requirements laid down by the regulatory bodies and the strategic attempts by educational institutions to manage research. Keeping this demand in mind, the objective of this workshop is to unpack what constitutes a great research paper and outline the pleasures and pitfalls of writing it. With the help of some characteristic examples and activities, the workshop will serve as a practical guide to the art of writing papers.

Topic Covered

- Theme 1: Generating and choosing an idea
- Theme 2: Connecting with the reader
- Theme 3: Literature review (with specific focus on review based papers)
- Theme 4: Making claims and supporting them
- Theme 5: Drafting a research paper
- Theme 6: Citations and referencing
- Theme 6: Plagiarism and ethics of paper writing

Outcome of the programme

- Students acquire insight in to how to draft a review article and project proposal
- Students will get an idea on how to check the project proposal and review article for plagiarism

No. of Participants: 34

Resource Person Mrs. Sanghamitra Mohapatra Delivering a Talk on the seminar “*Art of writing Review Articles and research thesis*” at MSB, BBSR on Dt: 02.08.2018.

M.Sc App. Microbiology	- 2 Years

About Programme

Genetic engineering has been used successfully to develop novel genes of economic importance that can be used to improve the genetics of crop plants. Genetic engineering is the targeted addition of a foreign gene or genes into the genome of an organism. The genes may be isolated from one organism and transferred to another or may be genes of one species that are modified and reinserted into the same species. The new genes, commonly referred to as transgenes, are inserted into a plant by a process called transformation. The inserted gene holds information that will give the organism a trait.

www.msb.ac.in

Objective of the Programme

The objective of the seminar is to bring Researchers, Scientists, Students and Industry persons to a same platform. They will discuss the various aspects of genetic engineering and application of genetic engineering for the benefit of mankind. Advancements in Genetic Engineering emphasizes on the areas such as mutant organisms, DNA replication, recombinant DNA, genetic linkage analysis.

PROGRAMME REPORT

17/09/2018

Programme Name	A Seminar on “Research Trends in Genetic Engineering and Biotechnology
Date of Activity:	15/09/2018
Resource Person:	Dr. Diptipriya Sethi CSIR Fellow, IMMT, Bhubaneswar Contact No: 9938488500 Email: dipti.priya123@gmail.com
Organised By:	MITS School of Biotechnology
Venue:	Dept. Biotechnology, MSB, Bhubaneswar

Objective of the programme

Genetic Engineering and Biotechnology is a field of applied science, which involves the use of plants, animals, humans and microbes in Engineering, Technology, Medicine and other fields requiring bioproducts. This multi-disciplinary conference aims to provide a challenging forum for researchers, academicians and industry practitioners to share their original research and product development experiences in emerging areas.

Topic Covered

Theme 1: Genetic engineering in biotechnology

Theme 2: Gene therapy

Theme 3: Genetic sequencing, gene editing

Outcome of the programme

- Students will get an idea recent trends and methods of genetic engineering and its application.
- Students also know about Gene therapy and next generation sequencing, together, will lead the biotechnology field to a fulfilling future.

M.Sc App. Microbiology	- 2 Years

About Programme

Biotechnology is one of the major technologies of the twenty first century. It's wide ranging, multi-disciplinary activities include recombinant DNA techniques, cloning and application of microbiology to the production of goods from bread to anti biotics and recombinant products. Most current biotechnology applications are of microbial original, and it is widely appreciated that the microbial world contains by far the greatest fraction of biodiversity in the biosphere. There has been great advances of biotechnological researches in the recent past which need to be highlighted for the benefit of scientific communitywide. The department of biotechnology MITS School of Biotechnology is going to organize a seminar on "Recent trends in microbiology and biotechnology" to encourage the active participation of young research scholars, scientist and academicians to showcase their progress in recent areas of microbial and biotechnological research.

Objective of the Programme

The objective of the conference is to share the knowledge about the recent tools and techniques used in various areas of microbiology and biotechnological research towards human benefit and for a better livelihood. The national seminar aims to bring together leading academicians, scientist, researchers, research scholars, graduate and undergraduate students to exchange and share their experiences about the recent development in microbial and biotechnological research.

PROGRAMME REPORT

17/11/2018

Programme Name	One Day Seminar on Recent Trends in Microbiology and Biotechnology	
Date of Activity:	16/11//2018	
Resource Person:	Dr. Sanghamitra Pati Director, RMRC, Bhubaneswar Contact No: 06742301332 Email: sanghamitra.pati@icmr.gov.in	
Organised By:	MITS School of Biotechnology	
Venue:	Dept. Biotechnology, MSB, Bhubaneswar	

Objective of the programme

Microbial technology is known as any technological application that uses microbiological systems, microbial organisms or their derivatives, to manufacture or modify products or processes for specific use. Microbial genomics and microbial biotechnology research is critical for advances in food safety, food security, biotechnology, value-added products, human nutrition and functional foods, plant and animal protection, and furthering fundamental research in the agricultural sciences.

Topic Covered

Theme 1: Bioprocessing (biochemical engineering, applied enzymology, industrial biotechnology, biofuels, metabolic engineering)

Theme 2: Materials and devices (bio nanotechnology, biomaterials, diagnostics/imaging/detection, soft robotics, biosensors/bioelectronics)

Theme 3: Microbes in food (role of microbes in food production)

Outcome of the programme

- Students acquire insight in to subjects like Microbiology, Molecular Biology and Genetic Engineering.
- Well versed with biotechnological remedies for human health and environmental problems.
- Trained in basic and advanced areas in Biotechnology to develop Biotechnological processes and products.

No. of Participants: 37

One day seminar on "Qualitative and Quantitative Research Methodologies"

Programme Schedule

05.01.2019

Organized By:

मिट्स जैव प्रौद्योगिकी संस्थान
MITS SCHOOL OF BIOTECHNOLOGY

Venue:

2(P), Infocity, Patia
Bhubaneswar-751024 (Odisha)
Website: msb.ac.in
Email: principal@msb.ac.in

About College

Consistently ranking as the best institute in the eastern part of India, MITS School of Biotechnology (MSB) is a self financing professional organisation that was founded in 2003. The faculty consists of having qualification of PhD, M.Tech as well as experience in both Academics and industrial research, so as the student graduates, who are equally impressive mostly working in leading industries of Biotechnology, Pharma and IT. MSB is considered to be most selective, accepting, growing and proven institute under Utkal University. The institute is located at the prime location of Infocity, Bhubaneswar. This prestigious institute includes popular programs of Biotechnology, Applied Micro Biology and Computer Science.

Courses Offered at MSB

BCA	- 3 Years
B.Sc Biotechnology	- 3 Years
M.Sc Biotechnology	- 2 Years
M.Sc App. Microbiology	- 2 Years

About Programme

Qualitative research involves collecting and analyzing non-numerical data (e.g., text, video, or audio) to understand concepts, opinions, or experiences. It can be used to gather in-depth insights into a problem or generate new ideas for research. Qualitative research is the opposite of quantitative research, which involves collecting and analyzing numerical data for statistical analysis. Qualitative research is commonly used in the humanities and social sciences, in subjects such as anthropology, sociology, education, health sciences, history, etc. Qualitative research is used to understand how people experience the world.

Objective of the Programme

The objective of the present seminar is to understand the difference between qualitative and quantitative research. It will help the researcher to understand the opinions, reasons, causes or trends that hide behind the data. The face to face interview method of data collection is the most commonly used method in qualitative research in which a small sample of respondents is interviewed for a long time, even for hours.

Sabyasachi Parida
Assistant Professor, Dept.
Microbiology, MPC Autonomous
College, Baripada

Date: 05/01/2019

LIST OF PARTICIPANTS

Name of the Programme: A one day Seminar on "QUALITATIVE AND QUANTITATIVE RESEARCH METHODOLOGIES"

SL.NO.	List of participants	Name of Institution	Signature
1	KAJAL SETHY	2nd Year MSC-BT	Kajal Sethy
2	RUCHIKA NAYAK	2nd Year MSC-BT	Ruchika Nayak
3	AISHWARYA SWAIN	2nd Year MSC-AMB	Aishwarya Swain
4	SUSHREE CHOUDHURY	2nd Year MSC-BT	Sushree Choudhury
5	MONICA MAHAPATRA	2nd Year MSC-BT	Monica Mahapatra

PROGRAMME REPORT

06/01/2019

Programme Name	A One Day Seminar on "Qualitative and Quantitative Research Methodologies
Date of Activity:	05/01/2019
Resource Person:	Mr. Sabyasachi Parida Asst. Prof. Dept. Biotech., MPC Autonomous College, Baripada Contact No: 7978286156 Email: <i>s.parida@gmail.com</i>
Organised By:	MITS School of Biotechnology
Venue:	Dept. Biotechnology, MSB, Bhubaneswar

Objective of the programme

The Research Methodology course was tailor-made to facilitate the academic requirements of students. The workshop was conceptualised with the intention of knowledge-building on the fundamentals of research concepts, methodologies and processes. Research methodology seminars are designed to teach students the principles and techniques used in conducting research studies. This seminar aimed to provide students with the skills and knowledge necessary to conduct rigorous and ethical research studies

Topic Covered

Theme 1: Research design: This includes the selection of research methods and the development of research questions and hypotheses

Theme 2: Sampling techniques: This includes the selection of participants for a study and the strategies used to ensure that the sample is representative of the population being studied

Theme 3: Data collection: This includes the use of various methods for collecting data, such as surveys, interviews, and observation

Theme 4: Data analysis: This includes the use of statistical methods to analyze data and draw conclusions

Theme 4: Ethics in research: This includes ethical considerations in conducting research, such as ensuring participant confidentiality and obtaining informed consent

Outcome of the programme

- Demonstrate the ability to choose methods appropriate to research aims and objectives.
- Understand the limitations of particular research methods.
- Develop skills in qualitative and quantitative data analysis and presentation. Develop advanced critical thinking skills.

About Programme

Biotechnology have touched every corner of the world laying major stress on applications to the environment, drugs, vaccines including a range of biopharmaceuticals, diagnostics, transgenic crops, improved tools for upgrading animal reproduction and quality, useful microbes, and food ingredients. Though India has improved its potential to contribute more to this industry, but in spite of infrastructure, funds, manpower, it need to put more efforts on up-grading system by building funding options, venture capitalists, bio-networking, IP development. Government initiatives are harnessing its valuable potential to derive values from technology. This seminar aims to discuss about the Biotechnology scope and research in India. This seminar will be a study about the opportunities in biotechnology research and challenges that it brings along with it.

Objective of the Programme

The objective of the program is to discuss the following themes.

- To discuss about the major research institutes undertaking Biotechnology research
- What are the scopes of Biotechnology research In India?
- Development of Biotechnology Research in the field of Agriculture, Health sectors
- What are the major drawback of Biotechnology Research?

PROGRAMME REPORT

08/02/2019

Programme Name	A One day Seminar on Challenges and Opportunities of Biotechnology Research in India
Date of Activity:	07/02/2019
Resource Person:	Dr. Sanatan Majhi Asst. Prof. Dept of Biotech., Utkal University, Bhubaneswar Contact No: 0943812873 Email: sanatan.biotech@utkaluniversity.ac.in
Organised By:	MITS School of Biotechnology
Venue:	Dept. Biotechnology, MSB, Bhubaneswar

Objective of the programme

Modern biotechnology provides breakthrough products and technologies to combat debilitating and rare diseases, reduce our environmental footprint, feed the hungry, use less and cleaner energy, and have safer, cleaner and more efficient industrial manufacturing processes.

- To develop and provide excellent research tools and capabilities through our resource facilities
- To enable student to acquire specialized skills in core aspects of biotechnology and apply them for the development of innovative technologies
- To promote, support and facilitate the overall development of both traditional and modern Biotechnology in the State, including livelihood development programmes

Topic Covered

- Theme 1: Plant Biotechnology
- Theme 2: Animal Biotechnology
- Theme: 3: Microbiology
- Theme: 4 Bioinformatics

Outcome of the programme

- Students develop global competencies in the area of basic and applied biological sciences.
- Enhancing the subject knowledge of students by using traditional and modern ICT based teaching methods and learning by doing
- To enrich students' knowledge and train them in various branches of Biotechnology such as genetics, molecular biology, biochemistry, immunology, fermentation technology,

About Programme

Intellectual Property is the term used to describe the branch of law which protects the application of thoughts, ideas and information which are of commercial value. It thus covers the law relating to patents, copyrights, trademarks, trade secrets and other similar rights. The development of the genetic resources of biodiversity is known as biotechnology. Broadly defined, biotechnology includes any technique that uses living organisms or parts of organisms to make or modify products, to improve plants or animals, or to develop microorganisms for specific uses. Mankind has used forms of biotechnology since the dawn of civilization.

Objective of the Programme

The main objective of the seminar is to create awareness about Intellectual property rights (IPR) There are several types of intellectual property protection like patent, copyright, trademark, etc. Patent is recognition for an invention, which satisfies the criteria of global novelty, non-obviousness, and industrial application.

PROGRAMME REPORT

15/03/2019

Programme Name	A One Day Seminar on IPR in Biotechnology and Bioinformatics
Date of Activity:	14/03/2019
Resource Person:	Dr. Sameer Ranjan Lenka Company Sec. MITS Mega food park ltd. Bhubaneswar Contact No: 7978241951 Email: <i>admin@mitsmegafoodpark</i>
Organised By:	MITS School of Biotechnology
Venue:	Dept. Biotechnology, MSB, Bhubaneswar

Objective of the programme

Intellectual Property Rights (IPRs) play a significant role in bioinformatics and biotechnology. IPRs help ensure that valuable discoveries are not taken advantage of by others. The main purpose of IPRs is to encourage and protect scientific research and development activities from being monopolized or misused by competitors.

Topic Covered:

Theme 1: The IP Laws and Bioinformatics and Biotechnology

Theme 2: Intellectual Property, Bioinformatics Databases and Government Funds

Theme: 3 The Diffusion of Biological Information

Theme: 4 Challenges and Difficulties in Bioinformatics and Biotechnology research

Outcome of the programme

- The field of Bioinformatics, Biotechnology and IP laws are intertwined when it comes to protecting one's hard work and income. Due to such rapid growth in the field, there are a lot of opportunities to attract more patent filings and give a boost to the Indian based biotech companies as well as companies situated outside the continent to invest in the Indian economy.
- This will not only give more exposure to the Indian biotechnology regime but will also help in the growth of the economy, thus leading to India's development and also the development of effectiveness of patent agents to file and handle cases of the IPR and Biotechnology

About Programme

An information security analyst safeguards an organization's digital assets and sensitive information from cyber threats and data breaches. They assess IT infrastructure and develop strategies like firewalls, encryption, and authentication to ensure confidentiality and prevent potential threats. In the realm of applied cyber security, this two-week student development program is planned to gear towards enhancing and staying up-to-date with the latest instructional methods. The goal is to equip participants with the knowledge and skills needed to deliver effective education in the field of cyber security, avenues for research and industrial application with certification

Objective of the Programme

The main objective of descriptive research is to define the characteristics of a particular phenomenon. It is also known as statistical research. It deals with everything that can be counted and studied. This descriptive methodology focuses on the "what" of the research problem.

PROGRAMME REPORT

20/05/2019

Programme Name	A One Day Workshop on Research Methodology for IT Students
Date of Activity:	18/05/2019
Resource Person:	Rashmi Ranjan Behera MITS Rayagada, Bhubaneswar Contact No:7008018094 Email: me@rbehera.in
Organised By:	MITS School of Biotechnology
Venue:	Dept. Biotechnology, MSB, Bhubaneswar

Objective of the programme

The main objective of this course is to introduce the basic concepts in research methodology in IPR. This course addresses the issues inherent in selecting a research problem and discusses the techniques and tools to be employed in completing a research project. This will also enable the students to prepare report writing and framing Research proposals

Topic Covered:

Theme 1: Basics in IPR

Theme 2: Research Design

Theme: 3 Data Collection

Theme: 4 Data Analysis

Theme: 5 Issues in Research

Outcome of the programme

- Students who complete this course will be able to understand and comprehend the basics in research methodology and applying them in research/ project work.
- This course will help them to select an appropriate research design.
- With the help of this course, students will be able to take up and implement a research project/ study.
- The course will also enable them to collect the data, edit it properly and analyse it accordingly. Thus, it will facilitate students' prosperity in higher education.
- The Students will develop skills in qualitative and quantitative data analysis and presentation.
- Students will be able to demonstrate the ability to choose methods appropriate to research objectives
- **No. of Participants: 33**

Resource Person Mr. Rashmi Ranjan Behera Delivering a Talk on *“Research Methodology for IT Students”* at MSB, BBSR on 18.05.2019.
