

## POLICY ON ENVIRONMENT AND ENERGY UTILIZATION

The Environment and Energy Utilization Policy of the college is to manage energy in a systematic way to reduce its impact on environment. The formulation of this policy underscores the institution's dedication to addressing environmental and energy concerns through ongoing enhancements in related activities. The policy ensures environment and energy compliance by adhering the sound environment and energy policies in academic and administration departments of institution.

This policy is obligatory for all facets of the institution and applies to various activities conducted by the institution. It is intended to integrate efficiency and environmental awareness into our daily operations, facilitating the fulfilment of our responsibilities and commitment to conserving natural resources and limiting their usage.

### POLICIES

- To access our energy usage and measure its impact on the environment.
- To reduce local pollution using environment friendly vehicles, including bicycles, public transport and use of pedestrian friendly road.
- To minimize the electricity usage and maximize the natural ventilation and energy substitution
- To install photovoltaic solar panel to generate alternate energy.
- To install LED bulbs in the whole campus to save energy.
- To develop systematic waste management mechanism.
- To develop rain water harvesting unit.
- To undertake tree plantation drive.
- To take additional measures to continuously reduce our energy consumption.
- To strengthen our employees and students environmental knowledge and skill to improve our own environmental performance.
- To provide information and training opportunities on energy saving measures.

This policy will be circulated to students and faculty members through internal communication channels. The Environment and Energy Utilization policy, along with its objectives and targets, will undergo periodic reviews under the guidance of the Director-MITS School of Biotechnology.
