# Semester-2

Туре	Code	COMMUNICATIVE ENGLISH	L-T-P	Credits	Marks	
CS	AECC-2		3-1-0	4	100	
<b>Topic Objective</b>		To learn the basics of Communication.				
		To make students proficient in it.				
		To develop the abilities for listening, speaking, reading, and writing.				
Prerequisites		Confidence, Vocabulary, Overcoming your fear of failure, Knowledge of Grammar,				
		Personal Communication, Professional Communication.				
Lecture Scheme		Regular lectures (classroom /virtual class with Laptop/Desktop/Smartphone) with				
use of ICT, lectures are planned to be interactive with focus on p		n problem	solving			
		activities.				

### **Evaluation Scheme**

Internal Assessm	nent	Written Assessment	Total	
Assignment(s) Unit Test Mid-Term			End-Term	
		(Written)		
5	0	20	60	80

# University Syllabus

Unit No	Topics	Hours
Unit-1	<ul> <li>Introduction:</li> <li>(i) What is communication?</li> <li>(ii) Types of communication (Horizontal, Vertical, Interpersonal, Grapevine),</li> <li>(iii)Uses of Communication, Inter-cultural communication, Communication today:</li> <li>(iv)Distinct features of Indianisation, alternative texts of language learning, global English and English in the print and electronic media in India.</li> </ul>	10
Unit-2	The Four Skills and Prospect of new material in language learning: (i) Listening-Passive and active, Speaking effective, intelligibility and clarity (ii) Methods and techniques of reading such as skimming, scanning and searching for information; Reading to understand the literal, metaphorical and suggested meaning of a passage, (iii) Identifying the tone (admiring, accusatory, ironical, sympathetic, evasive, indecisive, ambiguous, neutral etc.) of the writer and view-points. (iv) Cohesive and Coherent writing	10
Unit-3	<b>Grammatical and Composition Skills:</b> (i) Doing exercises like filling in the blanks, correcting errors, choosing correct forms out of alternative choices, joining clauses, rewriting sentences as directed, and replacing indicated sections with single words / opposites/synonyms, choosing to use correct punctuation marks, getting to understand and use formal and informal styles, learning to understand the usages of officialese, sexism,	10

	racism, jargon (ii) Learning to understand information structure of the sentence such as topic- focus relationship; strategies of thematization, postponement, emphasis, structural compression (deletion of redundant parts, nominalization, cleft and pseudo-cleft sentences, elliptical structures etc.), Logical Connectors between sentences, Methods of developing a paragraph, structure of an essay and methods of developing an essay		
Unit-4	Exercises in Written Communication:	10	
	(i) Précis writing		
	(ii) Note-taking skills		
	(iii) Writing reports		
	(iv) Guidelines and essentials of official correspondence for making enquiries, complaints and replies		
	(v) Making representations; writing letters of application for jobs; writing CV,		
	writing letters to the editor and social appeals in the form of letters/pamphlets.		
	Total (Hours)	40	

Text Books:

1. Communication Skills in English AICTE Prescribed Textbook (English) DIP122EN. By Anjan Tiwari. Publisher: Khanna Publishing; First Edition(1 January 2022)

### **Course Outcomes:** *At the end of this course, the students will be able to:*

C01	Students will review the grammatical forms of English and the use of these forms in
	specific communicative contexts, which include: class activities, homework assignments,
	reading of texts and writing.
CO2	Students will develop reading skills and reading speed. Students will read university texts
	and expand their vocabulary.
CO3	Students will develop reading skills and reading speed. Students will read university texts
	and expand their vocabulary.
C04	Students will read for intensive information retrieval and interpretation required by
	university studies. Students will develop abilities as critical thinkers, readers and writer.
C05	Students will attain and enhance competence in the four modes of literacy: writing,
	speaking, reading & listening. Students will write 3 summaries in which they will
	communicate appropriately, accurately and effectively what has been read.

### Program Outcomes Relevant to the Course:

P01	Knowledge Adaption: Ability to apply knowledge of computing appropriate to the
	discipline.
P02	<b>Problem Analysis:</b> Ability to analyze a problem and identify and define the computing
P03	<b>Design and Development:</b> Design system processes (components) that cater the exact
	needs
	of complex IT problems with background knowledge and intelligence on the need of hour
P04	Team Work : Ability to function effectively on teams to accomplish a common goal.
P05	Ethics and Social Responsibilities: Understanding of professional, ethical, legal, security
	and social issues and responsibilities.
P06	Effective Communication: Ability to communicate effectively with a range of audience

P07	<b>Computing Analysis Skill:</b> Ability to analyze the local and global impact of computing on				
	individuals, organizations and society.				
P08	Professional Ethics: Recognition of the need for ability to engage in continuing				
	professional development				
P09	To keep abreast of technology: Ability to use current techniques, skills and tools				
	necessary for computing techniques.				
P010	Coding Competency from Theory/Algorithms: Ability to apply algorithmic principles				
	and computer science theory in the modeling and design of computer-based systems in a				
	way that demonstrates comprehension of the tradeoffs involved in design choices.				
P011	Complexity Analysis: Ability to apply design and development principles in the				
	construction of software systems of varying complexity.

		(Written)					
0	0	15	60	75			

# **University Syllabus**

Unit	Topics	Hours
No		
Unit-1	Principles of Object-Oriented Programming: Object-Oriented Programming (OOP) Paradigm, Basic Concepts of OOP, Benefits of OOP, Characteristics of OOPS, Object Oriented Languages, Applications of OOP. Introduction to C++, Difference between C & C++, Tokens, Data types, Operators, Structure of C++ Program, C++ statements, Expressions and Control Structures. Functions in C++: Argument passing in function, Inline Functions, Default Arguments, Const. Arguments, Friend function.	10
Unit-2	Classes and Objects: Defining Member Functions, Making an outside Function Inline, Nested Member Functions, Private Member Functions, Arrays within a Class, Memory Allocation for Objects, Static Data Members, Static Member Functions, Arrays of Objects, Objects as Function Arguments, Friend Functions. Constructors & Destructors: Constructors Parameterized Constructors, Constructors with Default Arguments, Dynamic Initialization of Objects, Copy Constructor, Dynamic Constructors, Destructors.	10
Unit-3	Inheritance: Basics of Inheritance, Type of Inheritance, Virtual Base Classes, Abstract Classes, Member Classes, Nesting of Classes. Polymorphism: Pointers, Pointers to Objects, this Pointer, Pointers to Derived Classes, Virtual Functions, Pure Virtual Functions, Function Overloading, Operator Overloading.	10
Unit-4	Managing Console I/O Operations: C++ Streams, C++ Stream Classes, Unformatted I/O Operations, Formatted Console I/O Operations, Managing Output with Manipulators. Files: Classes for File Stream Operations, Opening and Closing a File, Detecting end-of-file, File Modes, File Pointers and their Manipulations, Sequential Input and Output Operations, Updating a File: Random Access, Error Handling during File Operations, Command-line Arguments.	10
	Total (Hours)	40

## **Text Books**

E. Balgurusawmy, Object Oriented Programming with C++, 4/e (TMH).
 Paul Deitel, Harvey Deitel, "C++: How to Program", 9/e. Prentice Hall. Online Resources:

C01	Understand OOP concept, characteristics and applications of OOP and fundamentals of C++.
CO2	Apply the OOP concept to write C++ program in proper program structure.
CO3	Apply inheritance concept to reuse code in C++ program and use of pointers in writing
	polymorphism programs.
CO4	Analyze the Basics of files to write C++ program and know Error handling during file
	operation.

**Course Outcomes:** *At the end of this course, the students will be able to:* 

# **Program Outcomes Relevant to the Course:**

P01	<b>Computing Knowledge</b> : Apply the knowledge of mathematics, science, logic, computing fundamentals to address complex problems.
P02	<b>Problem Analysis:</b> Ability in identifying, formulating and analyzing problems to derive substantiated conclusions through the applications of complex solutions.
P03	<b>Design and Development</b> : Create solutions and system processes tailored to address complex IT challenges, leveraging both background knowledge and relevant tools.
P04	<b>Investigation Techniques</b> : Employ computing knowledge and methodologies, such as experimental design, data analysis, interpretation and information synthesis to draw valid conclusions.
P05	<b>Utilization of Modern Technology/Tools</b> : Skillfully create, select and apply appropriate techniques, resources and computing tools while understanding their limitations.
P06	<b>Individual and Team Work:</b> Proficient in both independent and collaborative work across diverse environments, including leadership roles.
P07	<b>Technocrat and Society:</b> Utilize contextual knowledge to assess societal, legal and security issues relevant to professional practices.
P08	<b>Effective Communication</b> : Proficient in conveying complex ideas, writing reports, creating presentations and delivering messages to diverse audience.
P09	<b>Ethics</b> : Adhere to ethical principles and professional norms for conducting oneself in a professional context.
P010	<b>Skill and Competency</b> : Demonstrate the ability to analyze and apply the local and global impacts of project management, while consistently upgrading skill sets and navigating design various trade-offs.
P011	<b>Lifelong Learning</b> : Recognize the necessity and possess the readiness and capability to engage in independent and continuous learning within the evolving landscape of technology.

	Linked Lists: Dynamic memory allocation, representation, Linked list insertion anddeletion,			
	Searching, Traversing in a list, Doubly linked list, Sparse matrices.			
Unit-2	Stack: Definition, Representation, Stack operations, Applications (Infix–Prefix–Postfix	10		
	Conversion& Evaluation, Recursion).			
	Queues: Definition, Representation, Types of queue, Queue operations, Applications.			
Unit-3	Trees: Tree Terminologies, General Tree, Binary Tree, Representations, Traversing, BST,	10		
	Operations on BST, Heap tree, AVL Search Trees, M-way search tree, Applications of all trees.			
Unit-4	Sorting: Exchange sorts, Selection Sort, Bubble sort, Insertion Sorts, Merge Sort, Quick Sort,	10		
	Radix Sort, Heap sort.			
	Searching: Linear search, Binary search.			
	Total (Hours)	40

Туре	Code	LESSON PLAN	L-T-P	Credits	Marks			
Lecture No	Unit No	Data Structures	3-1-2	4+2	100			
Lecture01	1	<b>Topic:</b> Introduction to Data Structure, What is Data? V between Data and Information, Basic Terminology: Data, Data Type (ADT). <b>Ref:</b> TB (1.1, 1.2, 1.3, pg1-6): OR1:OR2:OR3:OR4:OR5:	Vhat is Info Information,	rmation? Data Typ	Difference e, Abstract			
Lecture 02	1	<b>Topic:</b> Classification of Data Structure: Linear Data Structu Definition of Algorithms, Flowchart of Algorithms, What do Time and space complexity: Best Case, Worst Case Average notation. <b>Ref:</b> TB (1 1-1 3 A 1-A 16, pg6-7& pg761-771); OB1:OB2:OB	<b>Topic:</b> Classification of Data Structure: Linear Data Structure & Non-linear Data Structure; Definition of Algorithms, Flowchart of Algorithms, What do you mean by a good algorithm, Time and space complexity: Best Case, Worst Case Average Case, $\Omega$ notation, $\Theta$ notation, O notation. <b>Ref:</b> TB (1.1-1.3.A.1-A.16, pg6-7& pg761-771): OR1:OR2:OR3:OR4:OR5:					
Lecture 03	1	<b>Topic:</b> Review of Array: Definition, Terminology, Types of A 1-D Array; Operations on Array: Traversing, Sorting, Search Multidimensional Arrays: Memory Representation of 2-D; A <b>Ref:</b> TB (2.1-2.4,pg12-24); OR1;OR2;OR3;OR4;OR5;	Array, Memo ing, Insertion Applications of	ry Repres n, Deletion of Array.	entation of n, Merging;			
Lecture 04	1	<b>Topic:</b> Structures: Defining a Structure, Declaring Structure Variable, Accessing Structure Members, Structure Initialization, Arrays of Structures, Arrays within Structures, and Structures within Structures. <b>Ref:</b> OR1:OR2:OR3:OR4:OR5:						
Lecture0 5	1	<b>Topic:</b> Pointers: Definition, Understanding Pointers, Accessing Address of a Variable, Declaring Pointer Variable, Initialization of Pointer Variable, Accessing a Variable through its Pointer, Chain of Pointers, Pointers & Arrays.						
Lecture0 6	1	<b>Topic:</b> Dynamic memory allocation: Introduction, Malloc, Calloc, Free,Realloc;Linked Lists:Definition, Representation of Linked List in Memory (Static Representation & Dynamic Representation) <b>Pof</b> : TR (3, 1-3, 2, pg36-30):OP1:OP2:OP3:OP4:OP5:						
Lecture 07	1	<b>Topic:</b> Operations on a Single Linked List:Traversing, Inserti and insert at any position), Deletion (delete at front, d position of a Single Linked List). <b>Ref:</b> TB (3.2,pg40-47); OR1;OR2;OR3;OR4;OR5;	on (insert at elete at end	front, ins d and del	ert at end, ete at any			
Lecture 08	1	<b>Topic:</b> Copying a single Linked List, Merging two Single Linked Lists, Searching an element in Single Linked List, Circular Linked List: Operations on Circular Linked List(Searching an element and Merging two Circular Linked Lists). <b>Ref:</b> TB (3.3.pg48-54); OR1:OR2:OR3:OR4:OR5:						
Lecture 09	1	<b>Topic:</b> Doubly Linked Lists: Understanding Double Linked Lists, Operations on Double Linked Lists (inserting a node at the front, inserting a node at the end, inserting a node at any position, delete at front, delete at end, delete at any position), Circular Double Linked Lists. <b>Ref:</b> TB (3.4-3.5,pg54-62); OR1;OR2;OR3;OR4;OR5;						
Lecture 10	1	<b>Topic:</b> Applications of Linked Lists: Sparse Matrix Manipula (polynomial having single variable and polynomial hav Storage Management. <b>Ref:</b> TB (3.6,pg63-73); OR1;OR2;OR3;OR4;OR5;	ation, Polync ing multiple	omial Repr variable	resentation ), Dynamic			

	2	<b>Topic:</b> Stack:Definition of Stacks, Representation of a Stacks (Array Representation of Stacks
		and Linked List Representation of Stacks), Stack Operations (PUSH, POP, STATUS of Array
Lecture 11		and Linked List Representations).
		<b>Ref:</b> TB (4.1-4.4,pg105-110); OR1;OR2;OR3;OR4;OR5;
	2	<b>Topic:</b> Applications of Stacks:Evaluation of Arithmetic Expressions (Notations for arithmetic
Lecture 12	_	expressions: Infix Notation, Prefix Notation, and Postfix Notation)
		<b>Ref</b> TB ( $4.5.1$ ng111-114): OR1:OR2:OR3:OR4:OR5:
	2	<b>Topic:</b> Conversion of an Infix Expression into Postfix Expression Evaluation of a Postfix
Lecture 13	2	Every
Lecture 15		<b>Ref</b> ·TB $(4.5 \text{ pg}115_118) \cdot \text{OR1} \cdot \text{OR2} \cdot \text{OR3} \cdot \text{OR4} \cdot \text{OR5} \cdot$
		<b>Topic:</b> Conversion of a Doctfiv Expression into a Code, Code Constration for Stack Machines
Lecture 14	2	
		<b>Rel</b> : TB (4.5.1,4.5.2, µg119-123); UR1; UR2; UR3; UR4; UR3;
Lecture 15	2	<b>I opic:</b> Implementation of Recursion: Factorial Calculation.
		<b>Ref:</b> IB (4.5.3,pg123-127); OR1;OR2;OR3;OR4;OR5;
		<b>Topic:</b> Queues:Introduction,Definition of Queue, Representation of Queue (Using Arrays and
Lecture 16	2	Using Linked List), Operations on Array Representation (Enqueue, Dequeue).
		<b>Ref:</b> TB (5.1-5.3.1,pg153-159); OR1;OR2;OR3;OR4;OR5;
		Topic: Queue operations on Linked List Representation (Enqueue, Dequeue, And Status of
Lecture 17	2	the Queue), Circular Queue: Array Representation of Circular Queue, Logical and Physical
	2	Views, Operations (Enqueue, Dequeue).
		Ref:TB (5.3.2-5.4.1,pg159-164); OR1;OR2;OR3;OR4;OR5;
Locture 19	<b>_</b> _	Topic: Deque: Introduction, Definition, Operations (Push, Pop, Inject, Eject).
Lecture 18	2	Ref:TB (5.4.2,pg164-166); OR1;OR2;OR3;OR4;OR5;
		Topic: Priority Queue: Introduction, Definition, Priority queue using an Array, Multi-queue
Lecture 19	2	Implementation, and Linked List Representation of a Priority Queue.
		<b>Ref:</b> TB (5.4.3,pg167-172); OR1;OR2;OR3;OR4;OR5;
		Topic: Applications of Queue: Simulation, CPU Scheduling in a Multiprogramming
Lecture 20	2	Environment.
		<b>Ref:</b> TB (5.5.1-5.5.2,pg172-186); OR1;OR2;OR3;OR4;OR5;
		<b>Topic:</b> Trees:Introduction. Basic Terminologies. Definition and Concepts of General Tree.
Lecture 21	3	<b>Ref:</b> TB (7.1-7.2,pg212-216); OR1;OR2;OR3;OR4;OR5;
		<b>Topic:</b> Binary Trees: Definition of Binary Tree, Full Binary Tree, Complete Binary Tree,
		Properties of a Binary Tree, Representations (Linear Representation, Advantages and
Lecture 22	3	Disadvantages of Linear/Sequential Representation, Linked Representation) Operations on
		Binary Trees
		<b>Ref:</b> TB (7.2.1-7.4.2.pg217-237): OR1:OR2:OR3:OR4:OR5:
		Topic: Traversals: Inorder Traversal Preorder Traversal Postorder Traversal Non-recursive
Lecture 23	3	Implementation of Traversal algorithms
Leeture 25	5	<b>Ref</b> (7 $4.3 \text{ ng} 237-243$ ): OB1:OB2:OB3:OB4:OB5:
		<b>Topic:</b> Formation of Rinary Tree from its Traversals (Formation from Inorder& Preorder
Locture 24	2	Inorder& Postorder, and Preorder & Postorder) Merging Together Two Binary Trees
Lecture 24	5	<b>Pof</b> ·TP $(7, 4, 2, 7, 4, 4)$ mg242 240); OP1·OP2·OP2·OP4·OP5·
		<b>Tenicy</b> Diparty Search Tree: Definition of Diparty Search Tree. Operations on BST (Searching a
		PST Inserting a Node into a DST Deleting a Node from a DST. Traversels on DST And
Lecture 25	3	Applications of DCT
		<b>Rel</b> :TB (7.5.2, pg254-265); UR1; UR2; UR3; UR4; UR5;
Lecture 26	3	<b>Topic:</b> Heap trees: Definition, Representation of a Heap Tree, Operations on a Heap Tree
		(Insert a Node Into a Heap Tree, Delete a Node from a Heap Tree, Merging Two Heap Trees,
		and Applications of Heap Trees.
		кет: тв (7.5.3,pg266-275); UK1;UK2;UK3;UK4;UK5;
Lecture 27	3	<b>IOPIC:</b> Height Balanced Binary Tree: Definition, AVL Rotations (Case1, Case2, Case3, Case4).
		<b>Ket:</b> IB (7.5.5,pg289-298); OR1;OR2;OR3;OR4;OR5;
Lecture 28	3	<b>Topic:</b> Implementation for Height Balancing a Tree, Height of a Height Balanced Binary Tree.
		<b>Ref:</b> TB (7.5.5,pg299-306); OR1;OR2;OR3;OR4;OR5;

Lecture 29	3	<b>Topic:</b> M-way search tree: Definition, B Trees, B Tree Indexing, Operations on B Tree(Searching, Inserting, Deleting) Lower and Upper Bound of a B Tree. <b>Ref:</b> TB (7,7-7,7,3,pg375-401): OR1:OR2:OR3:OR4:OR5:
		<b>Topic:</b> B+ Tree Indexing: Definition Operations on B+ Tree Indexing (Searching Insertion
Lecture 30	3	Deletion) B Tree vs B+ Tree
	5	<b>Ref</b> :TB (7.8 pg401-403): OR1:OR2:OR3:OR4:OR5:
		<b>Topic:</b> Sorting:Introduction_Basic Terminologies_Sorting Techniques (Sorting by Comparison
Lecture 31	4	and Sorting by Distribution).
Lecture SI		<b>Ref:</b> TB (10.1-10.2.pg528-532): OR1:OR2:OR3:OR4:OR5:
		<b>Topic:</b> Sorting by Insertion: Straight Insertion Sorts. List Insertion Sort. Binary Insertion Sort.
Lecture 32	4	and Two-Way Insertion Sort.
		<b>Ref:</b> TB (10.1-10.2,pg532-553): OR1:OR2:OR3:OR4:OR5:
	4	<b>Topic:</b> Sorting by Selection: Straight Selection Sort. Tree Selection Sort.
Lecture 33		<b>Ref:</b> TB (10.4-10.4.2.pg554-572); OR1:OR2:OR3:OR4:OR5:
	4	<b>Topic:</b> Heap sort: Introduction, Heap Tree (Max Heap, Min Heap), Sorting using Heap Tree,
Lecture 34		Create Heap, Remove Max, and Rebuild Heap.
		<b>Ref:</b> TB (10.4.3,pg573-591); OR1;OR2;OR3;OR4;OR5;
	4	<b>Topic:</b> Sorting by Exchange: Introduction, Bubble sort (Concept and Example)
Lecture 35		<b>Ref:</b> TB (10.5.1,pg593-599); OR1;OR2;OR3;OR4;OR5;
Lecture 36	4	Topic: Quick Sort: Introduction, Divide-and-Conquer, Divide-and-Conquer Approach in Quick
		Sort, Partition Method in Quick Sort.
		Ref:TB (10.5.4,pg612-629); OR1;OR2;OR3;OR4;OR5;
Lecture 37	4	<b>Topic:</b> Sorting by Distribution: Introduction, Radix Sort.
		Ref:TB (10.6-10.6.1,pg636-642); OR1;OR2;OR3;OR4;OR5;
	4	Topic:Sorting by Merging: Simple Merging, Binary Merge, Merge Sort (Internal Merge Sort
Lecture 38		and External Merge Sort).
		Ref:TB (10.7-10.7.7,pg658-687); OR1;OR2;OR3;OR4;OR5;
Lecture 39	4	Topic:Searching:Introduction, Basic Terminologies, Linear search Techniques (Sequential
		Search with Arrays, Sequential Search with Linked List.
		Ref:TB (11.1-11.2.2,pg712-720); OR1;OR2;OR3;OR4;OR5;
Lecture 40	4	Topic:Non-linear Search Techniques: Introduction, Binary Tree Searching, BST Searching.
Lecture 40		Ref:TB (11.3-11.3.2,pg738-751); OR1;OR2;OR3;OR4;OR5;

Lecture 21	3	Definition of correlation, simple linear correlation
		<b>Ref:</b> TB1 (Gupta and kapoor-Fundamental of statistics) chapter-10
Lecture 22	3	Scattered diagram
		<b>Ref:</b> TB1 (Gupta and kapoor-Fundamental of statistics) chapter-10
Lecture 23	3	Calculation of karl Pearsons correlation coefficient
		<b>Ref:</b> TB1 (Gupta and kapoor-Fundamental of statistics) chapter-10
Lecture 24	3	Calculation of partial correlation
		<b>Ref:</b> TB1 (Gupta and kapoor-Fundamental of statistics) chapter-10
Lecture 25	3	Definition of multiple correlation and calculation of multiple correlation
		coefficient
		<b>Ref:</b> TB1 (Gupta and kapoor-Fundamental of statistics) chapter-10
Lecture 26	3	Calculation of rank correlation coefficient, spearmans rank correlation
		coefficient, rank correlation with tied rank.
		<b>Ref:</b> TB1 (Gupta and kapoor-Fundamental of statistics) chapter-10
Lecture 27	3	Numerical problems based on correlation, rank correlation, multiple
		correlation
		<b>Ref:</b> TB1 (Gupta and kapoor-Fundamental of statistics) chapter-10
Lecture 28	3	Definition of regression analysis, lines of regression
		<b>Ref:</b> TB1 (Gupta and kapoor-Fundamental of statistics) chapter-10
Lecture 29	3	Calculation of regression coefficient
		<b>Ref:</b> TB1 (Gupta and kapoor-Fundamental of statistics) chapter-10
Lecture 30	3	Problems based on regression lines
		<b>Ref:</b> TB1 (Gupta and kapoor-Fundamental of statistics) chapter-10
Lecture 31	4	Principle of least square method for fitting curves, Derivation of normal
		eqn
		<b>Ref:</b> TB1 (Gupta and kapoor-Fundamental of statistics) chapter-9
Lecture 32	4	Fitting a straight line y=a+bx by using least square method
		<b>Ref:</b> TB1 (Gupta and kapoor-Fundamental of statistics) chapter-9
Lecture 33	4	Fitting a parabola and polynomial curve by least square method
		<b>Ref:</b> TB1 (Gupta and kapoor-Fundamental of statistics) chapter-9
Lecture 34	4	Exponential curve fitting by principle of least square method
		<b>Ref:</b> TB1 (Gupta and kapoor-Fundamental of statistics) chapter-9
Lecture 35	4	Theory of attributes, Definition of positive and negative attributes
		<b>Ref:</b> TB1 (Gupta and kapoor-Fundamental of statistics) chapter-11
Lecture 36	4	Class and class frequency of attributes, preparing FT of 2×2 attributes
		<b>Ref:</b> TB1 (Gupta and kapoor-Fundamental of statistics) chapter-11
Lecture 37	4	Independence and association of attributes
		<b>Ref:</b> TB1 (Gupta and kapoor-Fundamental of statistics) chapter-11
Lecture 38	4	Consistency of data, example on consistency of data.
		<b>Ref:</b> TB1 (Gupta and kapoor-Fundamental of statistics) chapter-11
Lecture 39	4	Measures of association and contingency
		<b>Ref:</b> TB1 (Gupta and kapoor-Fundamental of statistics) chapter-11
Lecture 40	4	Yules coefficient of colligation, numerical based on yules coefficient.
		<b>Ref:</b> TB1 (Gupta and kapoor-Fundamental of statistics) chapter-11
